

Air Filter with Rotary Airlock

Air Filters are designed to optimize airflow through the unit and minimize restrictions. These units have a precise measure of delta P, which is used to alarm and control cleaning cycles (only dirty bags are cleaned). Units feature a front door for easy bag access, and bags are connected with quick-release clamps to make bag-changing a snap.

Air Filter: Ordering Information

Item	Description		Order Code
Air Filters	Air Filters		DCU
Size	Diameter	Pump Size	
	16 inches	5-10 HP	16
	24 inches	5-20 HP	24
	32 inches	15-100 HP	32
Filter Type	Bag Pleated PTFE		BAG PLT PTFE
Receiver Conversion Kit (Optional)	Airlock Outlet Knifegate Outlet		RCV-ARLK RCV-KG

BIN VENT FILTERS

Features

- Five (5) polyester bag filters with 20-40 cfm/ft² permeability
- Capable of handling up to 1000 cfm
- Airtight construction with gaskets at all mating surfaces
- Compact design to reduce space requirements
- Access door for easy cleanout

ABS Bin Vent Filters are square air filtration units that mount directly to the storage bin. Constructed of mild steel with powder-coated finish, filters have a compact design to reduce space requirements. They feature airtight construction with gaskets at mating surfaces. Access doors allow for easy cleanout and filter bag changes.

Advanced Blending Solutions manufactures a full line of vacuum convey, feeding, blending, and storage equipment for the plastics industry. Advanced Blending Solutions also offers a full line of PLC/PC-based controls for gravimetric extrusion control, vacuum sequence control, extruder/die temperature control, and blender control.
