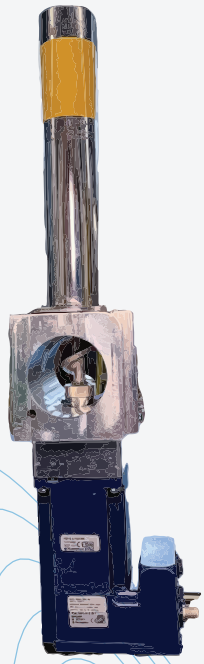
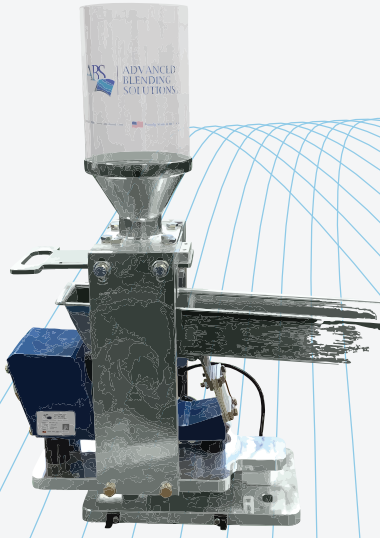
ADVANCED BLENDING SOLUTIONS LLC

Tomorrow's challenges solved today.

THUNDER & LIGHTNING

AUGER & VIBRATORY FEEDERS





THUNDER AUGER FEEDERS are engineered to handle a wide range of materials with reliable, controlled feed rates and minimal maintenance. Their compact, customizable design reduces waste, maintains a cleaner production environment, and improves overall system performance. Features like a cordless power connection, lockable motor drive, quick-connect auger tube, and integrated drain port make operation and cleaning fast and simple. Available in multiple models with feed rates from 1-1000 pph., Thunder feeders are built to meet manufacturing challenges head-on.

LIGHTNING VIBRATORY FEEDERS deliver consistent gravimetric flow for a variety of free-flowing materials at feed rates from 0.1-6,000+ pph. Built with premium materials and state-of-the-art manufacturing, Lightning feeders are versatile, rugged, and virtually maintenance-free, ensuring long-term, worry-free performance. Whether you need steady precision or high-volume versatility, ABS has the perfect feeder to keep your process running at peak efficiency.

Both feeders offer precise, reliable, and efficient continuous feeding technology. The only question is whether your production runs better with steady Thunder or the smooth flow of Lightning.
